

## **Administration Procedures for the Sixth Grade Science Assessment *TALKS***

TALKS = Title, Axis, Labels, Keys, Spacing

Given data and graph paper students will construct a bar graph including these essential parts: title, axes, labels, keys, and spacing.

Students will take a baseline assessment to determine their knowledge of bar graphs at the beginning of the 1st semester.

Teachers will collect data and provide instruction to increase student competency in using various forms of data to create bar graphs. Teachers can choose their methods and frequency of instruction throughout the school year.

Students will take a post assessment during the last quarter to demonstrate knowledge gained.

TALKS = Title, Axis, Labels, Keys, Spacing
